Jrban Consumers, the percentage change in which this table reports, is calculated from December to December. Sal

lary Increases for the years to 1985–86 are grouped in two–year intervals in order to present the full 1971-72 through

1 current year series. Nominal salary is measured in current dollars. The percentage increase in real terms is the per

centage increase in nominal terms adjusted for the percentage change in the CPI. Figures for All Faculty represent c

changes in salary levels from a given year to the next. Figures for Continuing Faculty represent the average salary of

nange for faculty on staff at the same institution in both years over which the salary change is calculated.
